

Wire Mesh RFQ Checklist

A practical quotation preparation worksheet for importers, distributors and project buyers.

Prepared by	ANJIA GROUP / Hebei Conquer Hardware Wire Mesh Co., Ltd.
Landing page	https://anjiamesh.com/tools/wire-mesh-rfq-checklist/
Send RFQ	https://anjiamesh.com/inquiry/
Use case	Collect product, specification, packing, document and destination details before quotation.

Scan for landing page		Use this page to download the latest checklist and send a complete RFQ to ANJIA.
------------------------------	--	--

How to use this checklist

Use this worksheet before sending a wire mesh quotation request. It helps buyers collect the information a supplier needs to prepare a clearer, more comparable quotation.

If a specification is not confirmed, write **to be confirmed**. If drawings, photos, a BOQ or samples are available, send them together with the RFQ.

- Suitable for welded wire mesh, wire mesh fence, chain link fence, gabion mesh, perforated metal sheet, expanded metal mesh, galvanized wire and custom metal mesh products.
- This worksheet supports quotation preparation. It does not replace project engineering review, local installation review, or compliance confirmation.
- For supplier proof, use the separate ANJIA Factory, QC & Packing Reference Pack.

Common RFQ delay checks

Missing detail	Why it delays quotation	Buyer action
Wire diameter / thickness	The same opening can have different weight and cost.	Send mm, gauge, sheet thickness or strand thickness.
Opening / pattern	Square, diamond, hexagonal, perforated and expanded patterns are quoted differently.	Attach a drawing, photo or previous specification.
Packing / labels	Packing affects protection, loading and warehouse sorting.	State roll, bundle, pallet, carton, label or mark needs.
Destination / documents	Port, trade term and documents change quotation assumptions.	Send country, port, trade term and required documents.

Quote-ready input table

RFQ field	Buyer input
Product type	
Application / use environment	
Material	
Wire diameter / gauge / thickness	
Mesh opening / hole pattern	
Roll size / panel size / sheet size	
Surface treatment / coating	
Edge / selvage / frame	
Accessories	
Quantity	
Packing requirement	
Destination country / port	
Preferred trade term	
Required documents	
Drawings / BOQ / reference photos	
Special notes	

What each RFQ field means

Field	What to provide	Why it matters
Product type	Exact product name or a clear photo if unknown.	Different products use different materials, machines and packing logic.
Application	Fencing, reinforcement, animal enclosure, screening, guard, retaining wall or other use.	Application helps confirm strength, coating and size assumptions.
Material	Low carbon steel, galvanized steel, stainless steel 304/316, aluminum, PVC coated wire or other material.	Material changes corrosion resistance, weight and cost.
Wire diameter / thickness	Wire diameter in mm, wire gauge, sheet thickness or strand thickness.	This strongly affects product weight, strength and price.
Mesh opening / pattern	Square, rectangular, diamond, hexagonal, round hole, slotted hole or expanded metal pattern.	Opening affects visibility, airflow, screening, strength and weight.
Size	Roll width/length, panel height/width, sheet size or finished custom size.	Size affects production, packing volume and freight planning.
Surface treatment	Hot-dip galvanized, electro galvanized, PVC coated, powder coated, painted, stainless finish or untreated.	Coating affects corrosion resistance, appearance and outdoor use.

Packing, documents and commercial scope

Field	What to provide	Why it matters
Accessories	Posts, clamps, bolts, gates, lacing wire, spirals, stiffeners or no accessories.	Clarifies whether accessories are included or quoted separately.
Quantity	Pieces, rolls, sheets, square meters, linear meters, tons or container plan.	Quantity affects MOQ, unit price and production scheduling.
Packing	Pallet, bundle, carton, waterproof paper, film, wooden case, labels or private label packing.	Packing affects surface protection, unloading and warehouse sorting.
Destination	Destination country, port, address if needed, and preferred trade term.	Destination supports logistics and document discussion.
Documents	Commercial invoice, packing list, certificate of origin, material document or test report when required.	Document needs should be confirmed early for project and distributor orders.
Drawings / photos	Drawing, BOQ, reference photo, current sample photo or installation sketch.	Visual references reduce misunderstanding for custom products.

Product-specific RFQ notes

Product	Send these details	Useful page
Welded wire mesh	Wire diameter, mesh opening, roll or panel size, material, surface treatment, quantity, packing and application.	https://anjiamesh.com/welded-wire-mesh/
Chain link fence	Fence height, wire diameter or gauge, diamond mesh size, roll length, selvage, coating, color and fittings.	https://anjiamesh.com/chain-link-fence/
Gabion mesh	Mesh opening, wire diameter, coating, roll or panel form, accessory requirement, project use and drawings if available.	https://anjiamesh.com/gabion/
Gabion box	Box size, diaphragm, lacing wire or spiral requirement, coating, packing method and project location context.	https://anjiamesh.com/gabion-box/
Perforated metal sheet	Material, sheet thickness, hole shape, hole diameter, pitch, sheet size, surface treatment and application.	https://anjiamesh.com/perforated-metal-sheet/
Expanded metal mesh	Material, strand width, strand thickness, SWD/LWD opening size, sheet size, surface treatment and application.	https://anjiamesh.com/expanded-metal-sheet/

Export packing details to confirm

- Will the goods be packed in rolls, bundles, pallets, cartons or wooden cases?
- How will the surface be protected during loading and sea transport?
- Are labels, shipping marks, private labels or barcode requirements needed?
- Can mixed products be loaded in one container with clear item separation?
- Should packing photos, label photos or loading photos be provided before shipment?

Documents to discuss when required and applicable

- commercial invoice
- packing list
- certificate of origin
- material document or test report
- quality inspection photos
- loading photos

Copy-ready RFQ message

Hello ANJIA GROUP,

We are preparing a quotation request for wire mesh products.

Product type:

Application:

Material:

Wire diameter / gauge / thickness:

Mesh opening / hole pattern:

Roll size / panel size / sheet size:

Surface treatment:

Edge / selvage / frame:

Accessories:

Quantity:

Packing requirement:

Destination country / port:

Preferred trade term:

Required documents:

Drawing / BOQ / reference photo:

Please help check whether the information is complete for quotation and advise if any specification needs to be confirmed.

Final review before sending

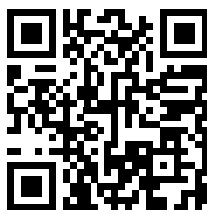

Check item	Done
Product type and application are included	
Material and surface treatment are included	
Wire diameter, gauge or thickness is included	
Mesh opening, hole pattern or drawing is included	
Roll, panel or sheet size is included	
Quantity and unit are included	
Accessories are included or excluded clearly	
Packing requirement is included	
Destination country and port are included	
Photos, drawings or BOQ are attached if available	
Uncertain items are marked as to be confirmed	

Contact ANJIA GROUP

ANJIA GROUP supplies wire mesh, fencing, gabion mesh, perforated metal, expanded metal, galvanized wire and related custom metal mesh products for global B2B buyers.

Company	Hebei Conquer Hardware Wire Mesh Co., Ltd.
Brand	ANJIA GROUP Wire Mesh & Fencing
